

# COSC 5P01 – Coding Theory

## Winter 2020

### Term Paper Description

**Final Paper Due: Monday, 27<sup>th</sup> April, 9:30 am**  
**The paper accounts for 15% of your final grade.**

All students are to complete a paper that includes and expands upon the information covered in their class presentation.

Organization of the paper is important: you will be penalized for a paper that is low on content and/or is repetitive and/or does not get to the point. You are advised to write your paper using LaTeX – in this case, a good resource you may wish to consider is Overleaf (see [overleaf.com](https://overleaf.com)). If using the *IEEEtran* document class for LaTeX, the paper should be approximately 6-8 pages in length, including all figures, examples and references. Note: the variation in length is primarily to allow for differences due to figures, not other content.

#### **Submission Requirements:**

Your paper should be saved as a PDF and submitted electronically by creating a directory on Sandcastle containing the PDF document, and then running the script `submit5p01` from this directory.
